Bright TV

Viewer Engagement Analysis
01 January 2016 - 01 April 2016

A Data-Driven Analysis of Demographics, Geography, and Content Preferences

Presented By: **Phillipine Sithole**

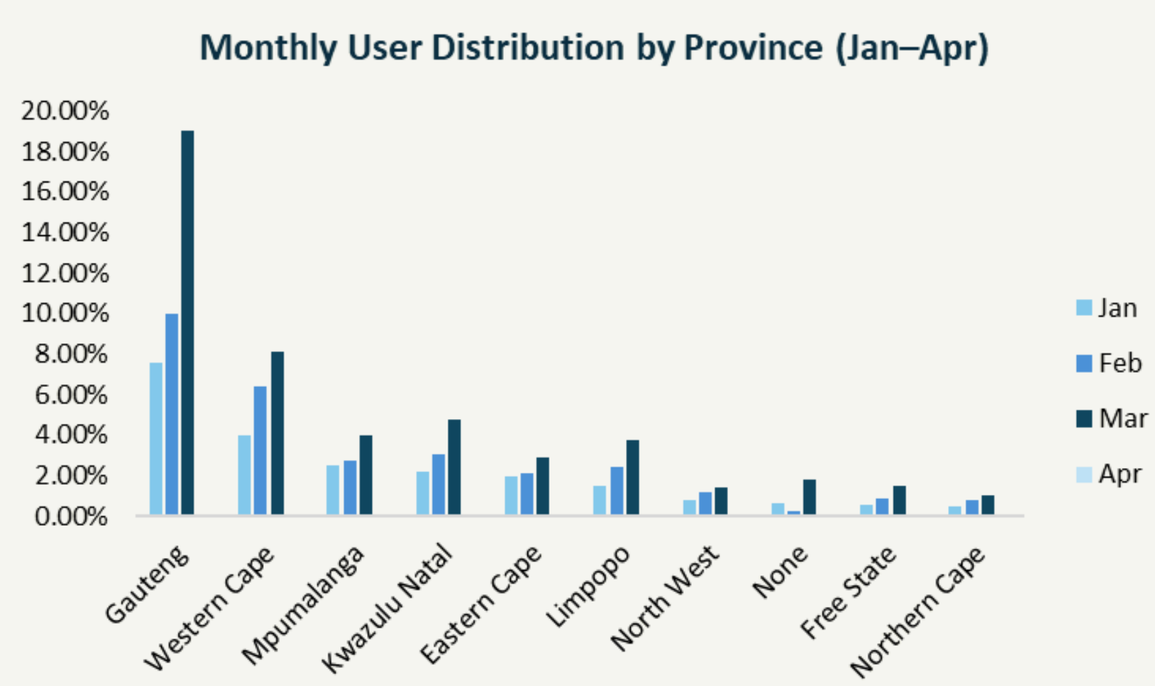
Agenda

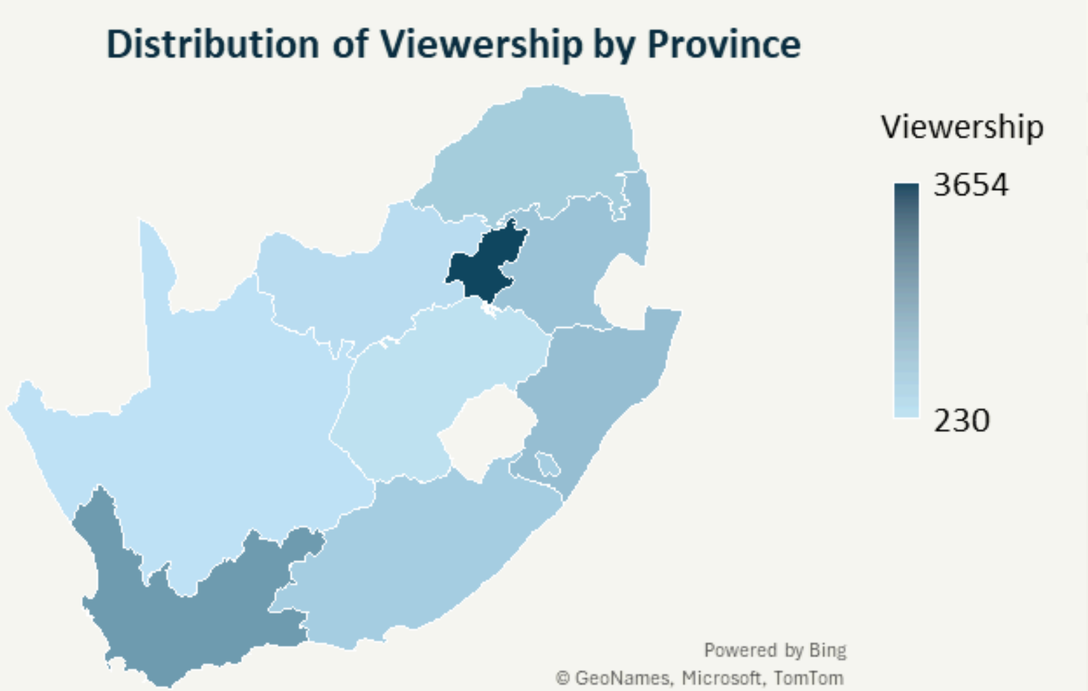
Aim

To analyze BrightTV's user profiles and viewership behavior in order to identify key trends, understand the factors influencing content consumption, and provide data-driven recommendations that will support the growth of BrightTV's subscription base.

1. Viewership Trends
2. The Core Customer Profile
3. Content Consumption Analysis
4. Strategic Recommendation

Regional Viewership Trend

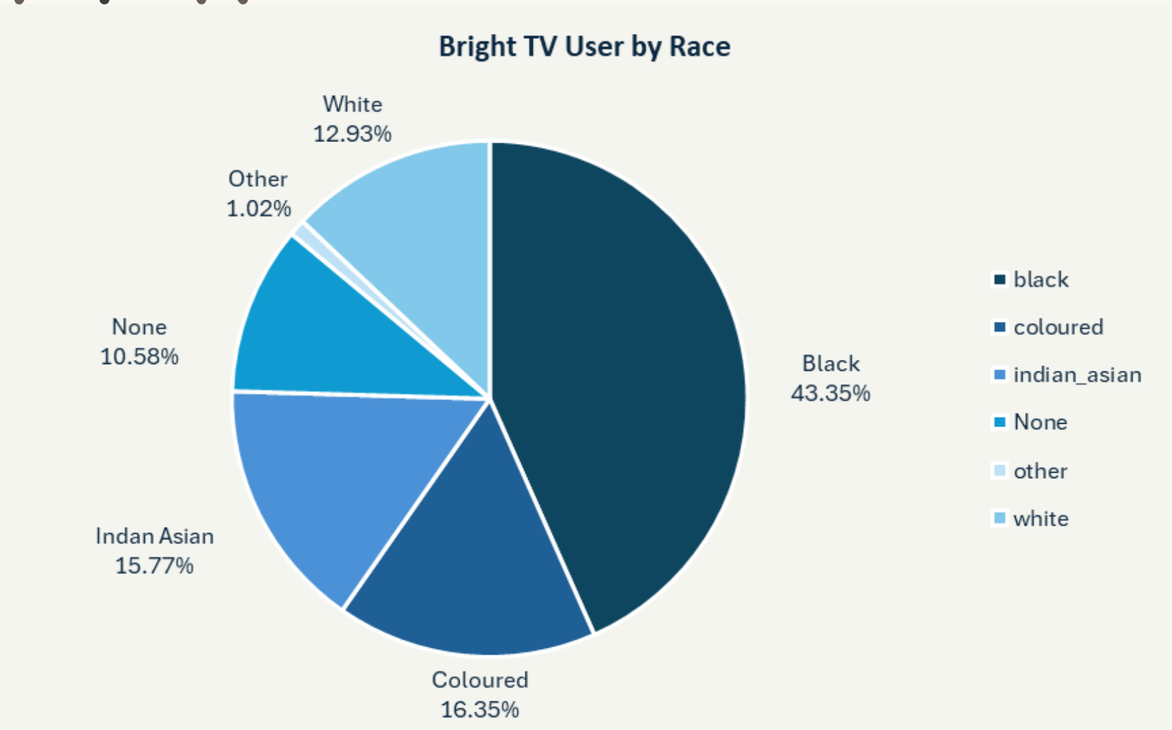




Key Insights

- Strong growth was observed from January to March, with total customer activity increasing by 26.17%, indicating rising engagement over the period.
- Viewership is highly concentrated in key economic hubs, with Gauteng dominating at 36.54% of total views, followed by the Western Cape at 18.45%, confirming a strong urban-driven audience base.

Viewership by Race and Gender

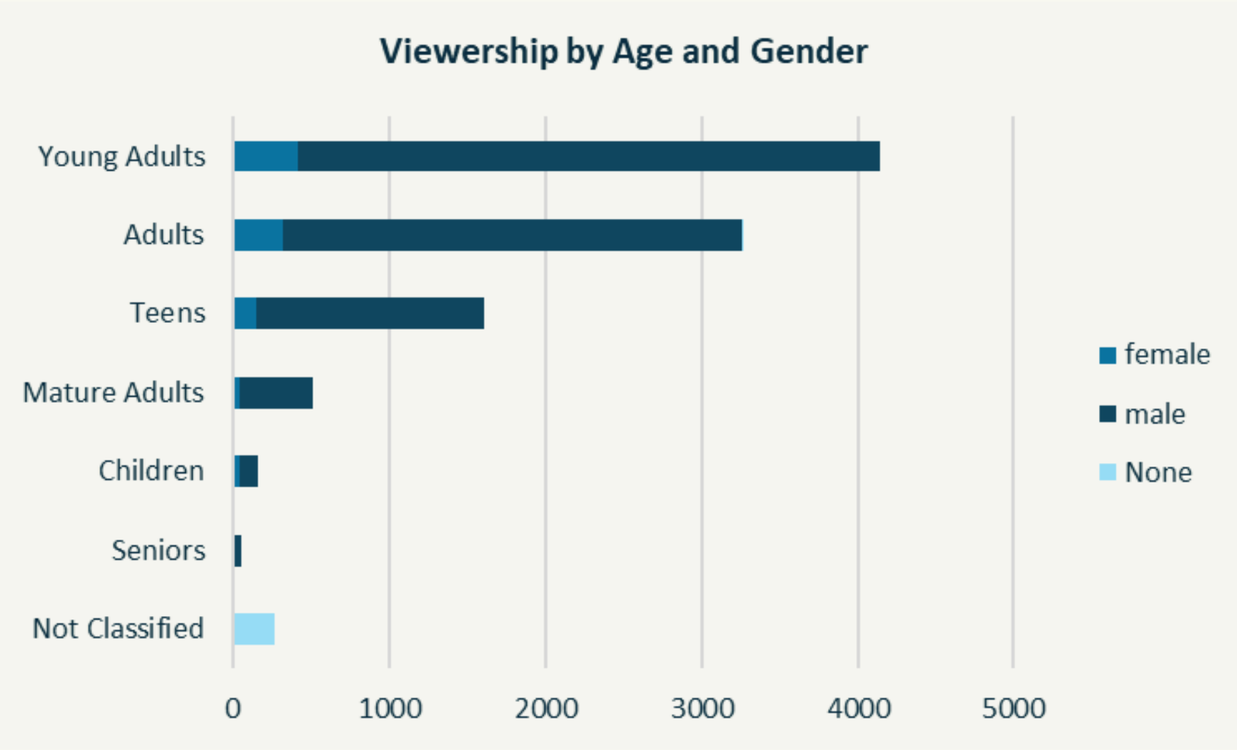


Race	Male	%	Female	%	None	Total Count of Users
Black	3830	38.30%	501	5.01%		4331
Coloured	1498	14.98%	135	1.35%		1633
Indian Asian	1483	14.83%	92	0.92%		1575
White	1177	11.77%	115	1.15%		1292
None	670	6.70%	125	1.25%	262	1057
Other	95	0.95%	7	0.07%		102
Blank	8	0.08%	2	0.02%		10
Total	**8761**	**87.61%**	**977**	**9.77%**	**262**	**10000**

Key Insights

- Viewership is heavily concentrated among Black audiences (43.35%), with a diverse but smaller contribution from Coloured, Indian/Asian, and White groups.
- Total viewership is 10,000, with a strong gender imbalance: Male viewers dominate at 87.61% (8,761) compared to Female viewers at 9.77% (977), while 2.62% (262) is unclassified (“None”).

Usage Consumption by Age and Gender

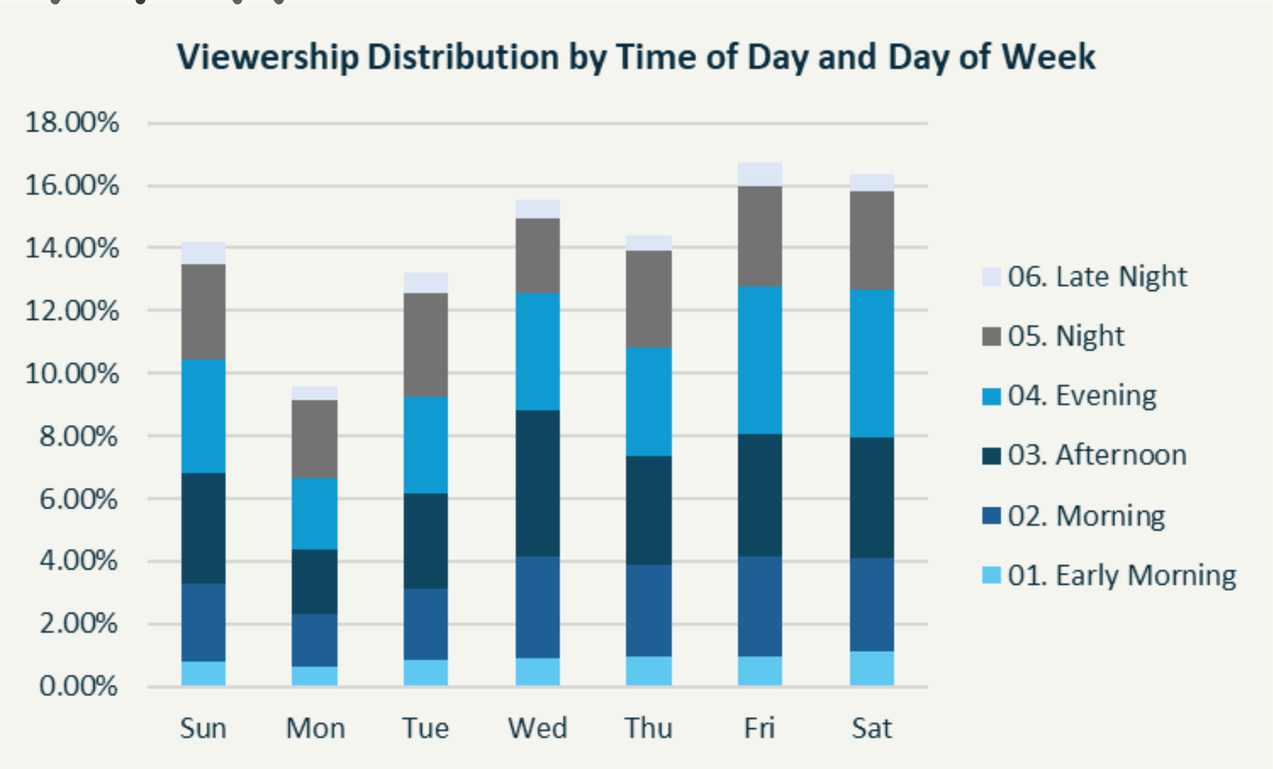


Age Range	Description
0	Not Classified
1 - 5	Kids
6 - 24	Children
15 - 24	Teens
25 - 34	Young Adults
35 - 49	Adults
50 - 64	Mature Adults
>=65	Senior

Key Insights

- 74.11% of our viewership is from the young adults and adults, confirming a core working-age audience base.
- Teen engagement is significant (16.06%), suggesting strong pipeline growth into adult segments.
- Strong male skew (87.61%) is consistent across all age groups.

Daily Viewership

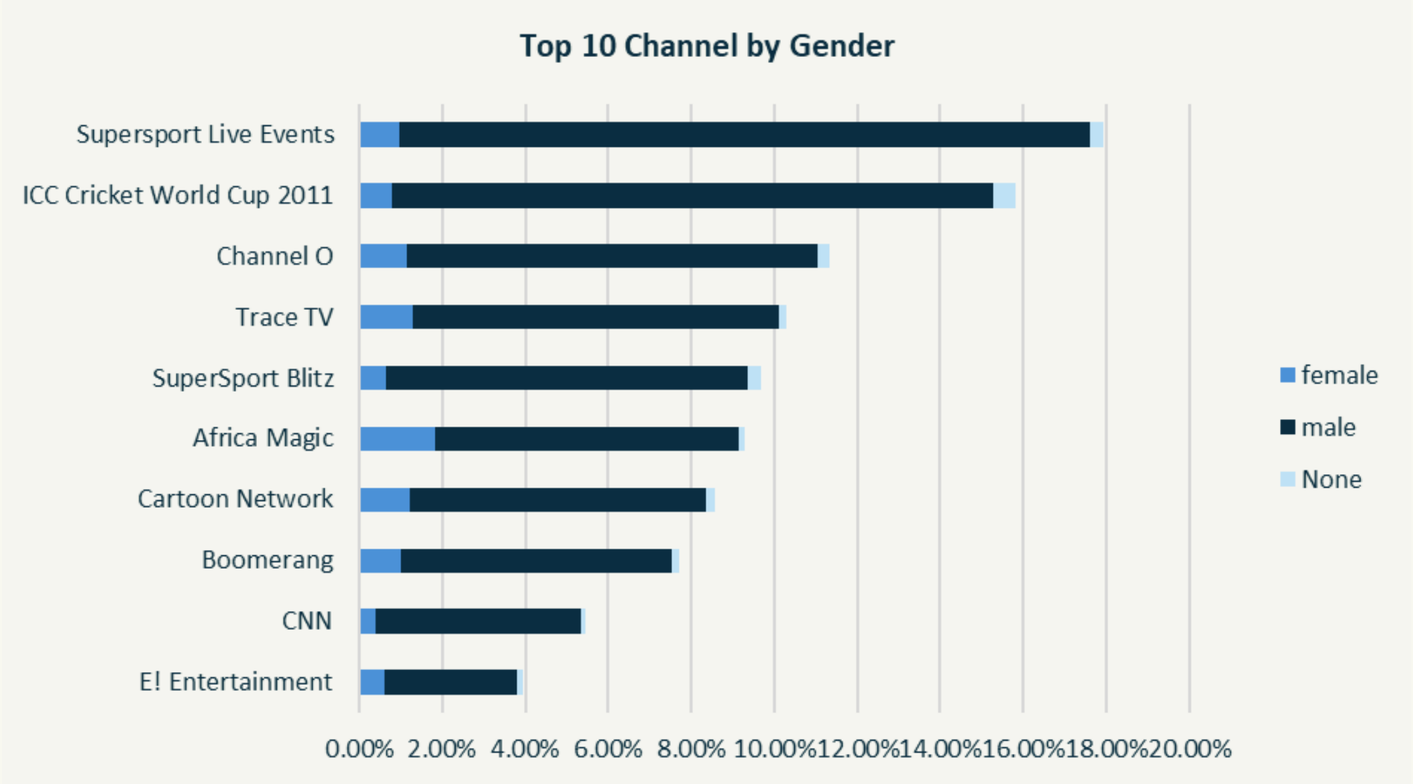


Time of day	Description	Views	%
04:00:00 - 07:59:59	Early Morning	621	6.21%
08:00:00 - 11:59:59	Morning	1883	18.83%
12:00:00 - 15:59:59	Afternoon	2459	24.59%
16:00:00 - 19:59:59	Evening	2550	25.50%
20:00:00 - 23:00:00	Night	2069	20.69%
00:00:00 - 03:59:59	Late Night	418	4.18%

Key Insights

- Viewership is primarily prime-time driven, with Afternoon–Evening–Night accounting for over 70% of total activity, indicating strong post-work consumption behaviour.
- Engagement peaks on Fridays (16.75%) and Saturdays (16.33%), reflecting clear weekend entertainment dominance, while Monday is the weakest day (9.57%), likely due to reduced leisure availability at the start of the workweek.

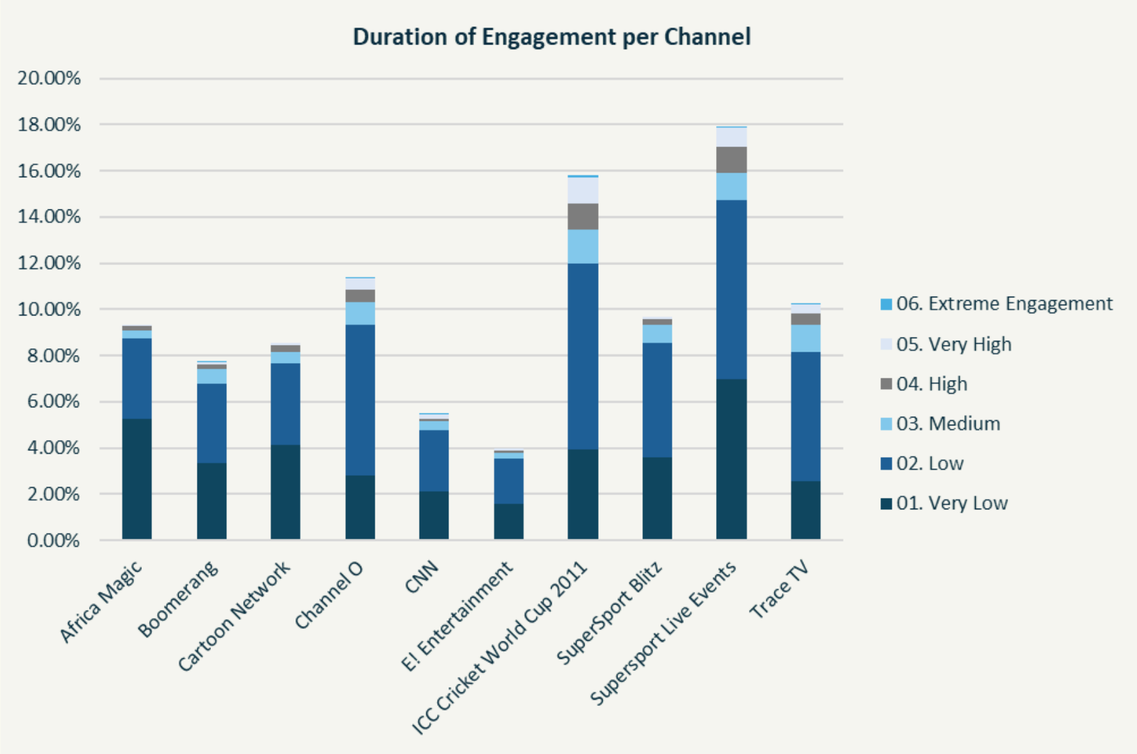
Top 10 TV Channel Viewership by Gender



Key Insights

- Viewership is heavily skewed toward male audiences (87.70%) and strongly driven by sports content, with Supersport Live Events and Cricket accounting for the largest share of consumption (33.76%).
- Entertainment and youth-oriented channels provide secondary engagement contributing ~16%.

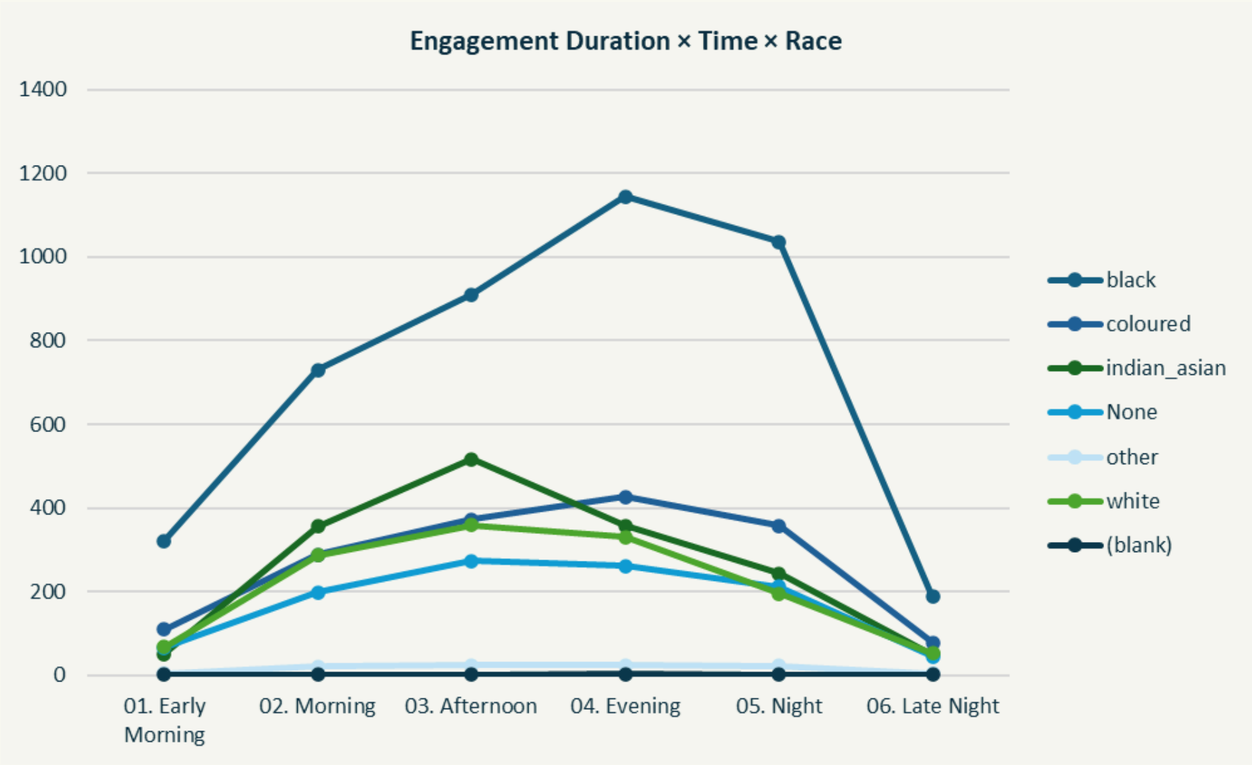
Overall Engagement per Channel



Key Insights

- While overall viewership is high, engagement depth is low (84% in low tiers), with live sports content and ICC Cricket World Cup 2021 standing out as the only category driving strong, sustained viewing, while most other channels experience short, low-commitment viewing sessions.

Consumption by Time Cohort



Key Insights

- Engagement depth is strongest during prime-time hours and among Indian_Asian viewers.
- while Black audiences provide scale with stable engagement, and off-peak periods show inconsistent behaviour, likely due to smaller, niche audiences.

Factors Influencing Consumption

1. Location

- Gauteng and Western Cape province account for the thickest clustering of high viewership leaving other provinces as secondary markets due to population density and access to internet.

2. Age Group and Audience Demographics

- Consumption is heavily influenced by working-age, male-dominated, urban audiences, with Young Adults and Adults driving the majority of viewership.
- Different demographic groups exhibit distinct viewing behaviors while some drive volume (e.g., Black audiences), others drive engagement depth (e.g., Indian/Asian viewers).

3. Time Availability

- Consumption is heavily aligned to free time, with clear peaks during: Evenings (after work/school) and Weekends (especially Friday & Saturday).
- This indicates that viewing is not random, but structured around daily routines.

4. Content Type Determines How Long They Stay

- While many users tune in, only certain content keeps them engaged:

Live sports and event-based content drive longer sessions and repeat viewing.

- Entertainment and music attract users but with moderate engagement

News and kids content tend to have shorter, more fragmented sessions.

Strategic Recommendation

1. Grow Monthly Users (Acquisition)

- Target underpenetrated groups (women, seniors, children) with tailored content
- Expand reach in low-performing provinces (Free State, Northern Cape, North West.
- Run acquisition campaigns around major events (sports, premieres, weekend)

2. Strengthen Content Strategy (Retention Driver)

- Scale high-performing sports content (live events, cricket, SuperSport)
- Improve entertainment & news formats (shorter, more engaging segments)
- Introduce exclusive and local content for differentiation

3. Optimize Viewing Time (Increase Consumption)

- Prioritize prime-time (Afternoon–Evening–Night) scheduling
- Release premium content on Fridays and Saturdays
- Use binge-friendly formats and auto-play features

4. Expand Across Age Groups

- Young Adults (core): personalize recommendations and loyalty rewards
- Teens: focus on music, trends, and short-form content
- Children: structured cartoon blocks for family viewing
- Women & Seniors: introduce lifestyle, drama, and news content

5. Increase Engagement Depth

- Reduce low engagement behavior (~84%)

Improve:

Content hooks in first 5 minutes

“Continue Watching” features

Personalized recommendations
